

BRAZIER OF LIGHT - TERMINI STATION

ROME - ITALY

Credits

Category: Design

Client: Atelier Mendini

Location: Rome - Italy

Architect: Alessandro Mendini

Type of work: Interior Lighting

Lighting Design: Filippo Cannata

Lighting Design team: N. Fiorillo, D. Panarese

Completed: 1999

The "totem" designed by Alessandro Mendini for the illumination of the Mazzonin wing of Termini Station in Rome (Giolitti Street side), became an object of study for Cannata&Partners. The fixture which was conceived to accommodate light bulbs for indirect lighting consists of a central cup and two lateral wings, designed ad hoc in collaboration with the company Franz Sill, whose parabolas distribute the light in the area below in a discreet, sophisticated and harmonious way enhancing the impressive architecture.
