

DESIGN OF TALL EMBLEM STRUCTURE AT ZA'ABEEL PARK

DUBAI - UAE

Credits

Category: Competition
Client: ThyssenKrupp Elevator
Location: Dubai - UAE
Architect: Pica Ciamarra and associates
Type of work: Interior and Exterior Lighting
Lighting Design: Filippo Cannata
Lighting Design team: N. Fiorillo
Completed:

The structure at night-time transforms into a light sign. It becomes a contemporary lighthouse with gentle colour tints and chromatic contrasts which help the park and the adjacent neighbourhood. The lighting concept becomes the link between the architecture and the surrounding area, a link able to convey wellness to the visitors. The purpose of this work is mainly focused on the use of the new available lighting technology which helps to create an interactive and playful atmosphere for the visitor. The lighting basically follows the architecture which minimize the cosmetic use of other lighting fixture to light up the surrounding of the structure. The led panel used to cover the structure becomes a display and a platform which consents to express in art form.
